SUMMARY STATEMENT

Fraud strategy and intelligence professional with 10+ years of experience identifying emerging fraud trends, strengthening risk controls, and developing scalable prevention strategies that reduce losses and protect customers. Experienced in the scope of a Fraud Intelligence Lead, translating complex fraud signals into platform-level controls, automated defenses, and prototyped detection tooling. Using SQL for large-scale analysis and data visualization; track record partnering with Product, Engineering, Data Science, Trust & Safety, and offshore safety operations teams to implement automation and improve detection. Proven ability to influence cross-functional strategy, mentor analysts, and deliver executive-ready investigative reports.

EXPERIENCE

SQUARETRADE- REMOTE

FRAUD STRATEGY ANALYST, TRUST & SAFETY TEAM 03/24 - PRESENT

- Designed and managed an overwatch process for vendor operations, establishing quality standards and risk assessment protocols that identified \$250K+ in fraudulent activity and prevented \$100K in losses.
- Optimized operational workflows and fraud detection strategies to reduce customer call volume by 80%, lowering staffing needs and saving \$60K annually while enhancing service delivery.
- Collaborated on an API-driven automation initiative that reduced manual workload by nearly 50% and cut operational costs by \$85K annually through improved system readiness and fraud monitoring.
- Developed comprehensive documentation and SOPs for 35+ agents, ensuring consistent performance and operational excellence across all fraud prevention workstreams.
- Built a real-time escalation dashboard using data visualization tools that reduced department escalations by 31%, improving triage visibility and accelerating response times to emerging fraud risks; prepared executive summaries to inform stakeholders.
- Leveraged SQL and Altair for deep-dive analysis of large datasets to streamline workflows, reducing incoming ticket volume by 43% and improving team efficiency in fraud investigation and anomaly detection.

WAYFAIR - BOSTON, MA

SENIOR OPERATIONS SPECIALIST POST ORDER FRAUD 03/21 - 03/23

- Owned post-resolution photo review process for customer incident claims, conducting investigations and managing case management workflows for an offshore team of 10 agents, resulting in \$2M of annual savings.
- Redesigned internal scam and policy abuse tracking, collating three automated reports for stakeholders to drive data-driven risk analysis and identify emerging fraud trends across customer cohorts.
- Collaborated with engineering and data science to design and evaluate the first AI/Machine Learning account association algorithm, identifying system vulnerabilities and providing feedback for a robust real-time investigation tool used by 150 members.

EDUCATION

BRIDGEWATER STATE UNIVERSITY, Bridgewater, MA

Masters of Business Administration 07/22

Finance, General Accounting, Economics, Mathematics, Marketing, Statistics

WHEATON COLLEGE, Norton, MA

Bachelor of Arts 05/12
